## **DETAILED ACTION**

### ***Allowable Subject Matter***

1. Claims 1-11 are allowed.
2. The following is an examiner's statement of reasons for allowance:

U. S. Patent No. 5,161,115 to Teshima et al. is the reference closest to the claimed invention. Teshima et al. disclose a method for computer-supported error analysis of at least one of sensors and actuators in a technical system, the error analysis being in a form of a finite state description that exhibits states of the technical system, the method using a computer, comprising the steps of: a) determining a finite state description of the technical system for an error case of an error of at least one of a sensor and an actuator in the technical system. However, Teshima et al. do not teach b) determining a first set of achievable states for the technical system without errors using the finite state description; c) determining a second set of achievable states for the technical system having an error, using the finite state description d) forming a difference set from the first set and the second set; and e) determining result conditions from the difference set, the result conditions meeting prescribable conditions; and including all of the other limitations in the respective independent claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
